Blood Module Revision

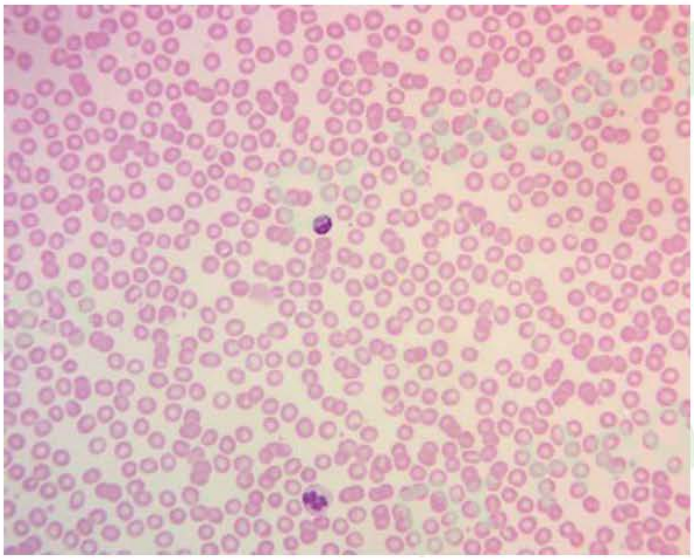

Real Lab

Dr Hegazy

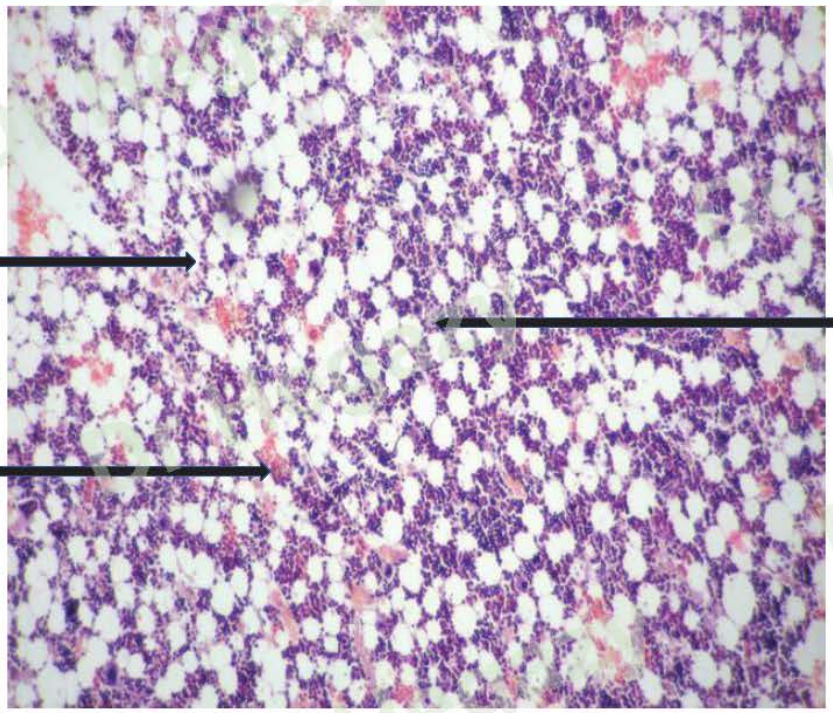

Blood film
Leishman's stain

Blood film

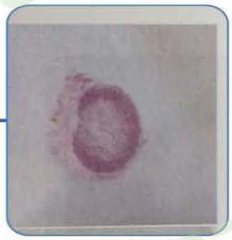

Bone Marrow

Dr Hegazy

BY naked eye

Lymph node

Kidney shaped structure, with dark periphery (cortex) & Pale center (medulla)

Spleen

Red background with scattered blue spots

Palatine Tonsil

S- Shaped structure

Thymus Gland

Lobulated structure; each lobule has a dark edge (cortex) & a pale center (medulla)

H&E stained sections

Computer Lab

1. **Identify the RBCs in a blood film.**
2. **Identify the RBCs by TEM & SEM.**
3. **Identify the platelets in TEM photos.**
4. **Identify Lymphocytes and Neutrophils in a blood film.**
5. **Identify the Neutrophils, Eosinophils and Basophils by TEM.**

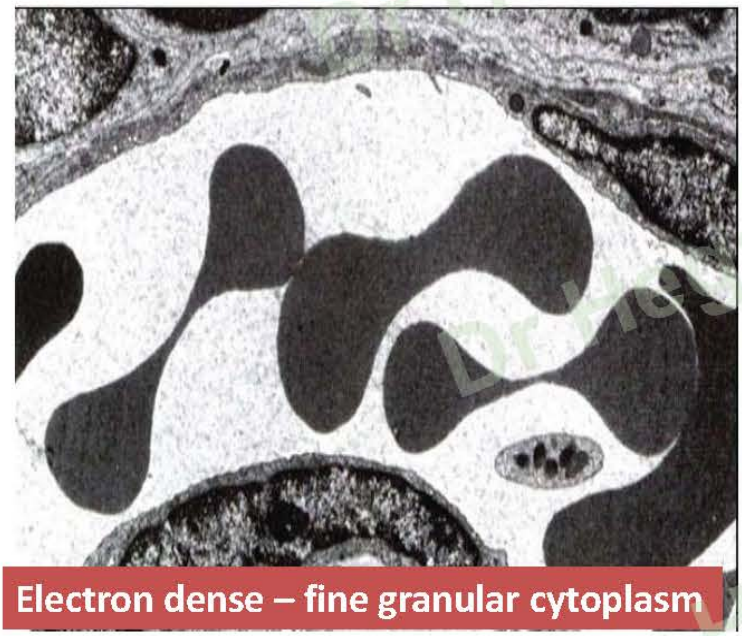

Dr Hegazy

Erythrocytes in blood film
Leishman's Stain

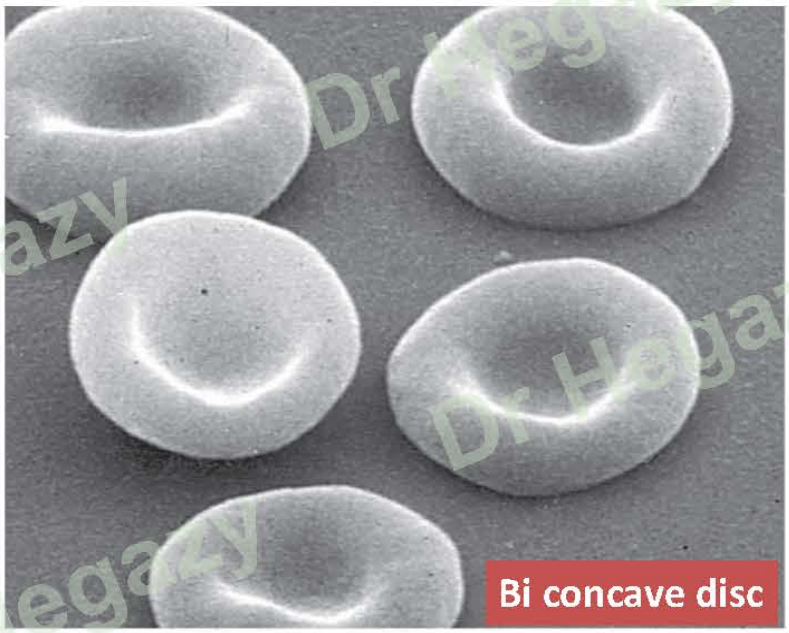

Erythrocytes

TEM

Electron dense – fine granular cytoplasm

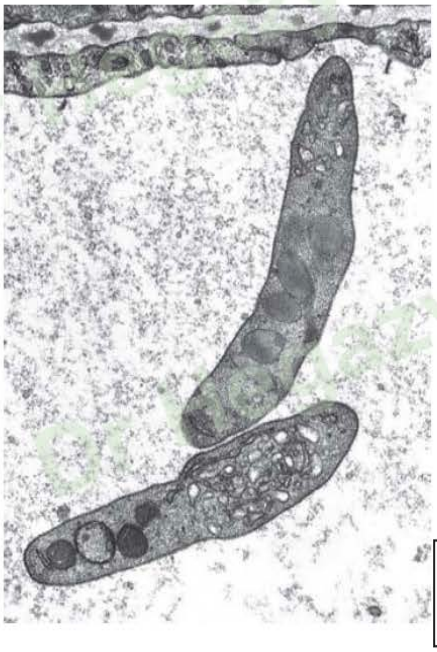

SEM

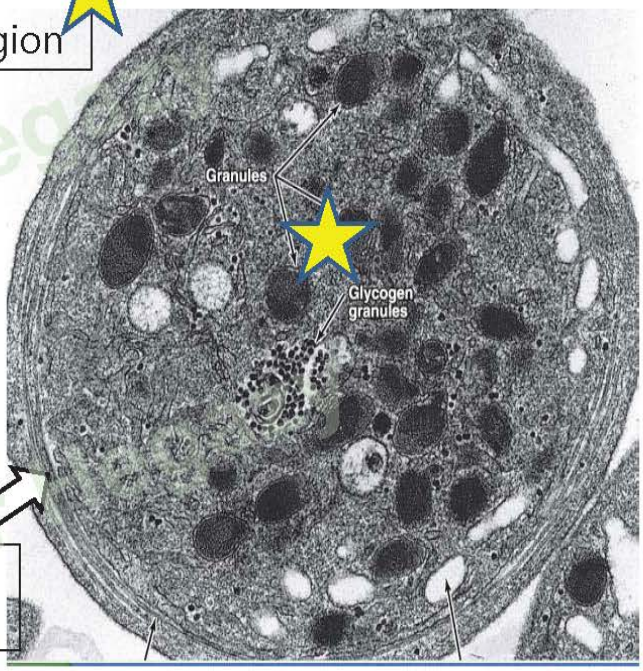

Bi concave disc

Dr Hegazy

Platelets (TEM)

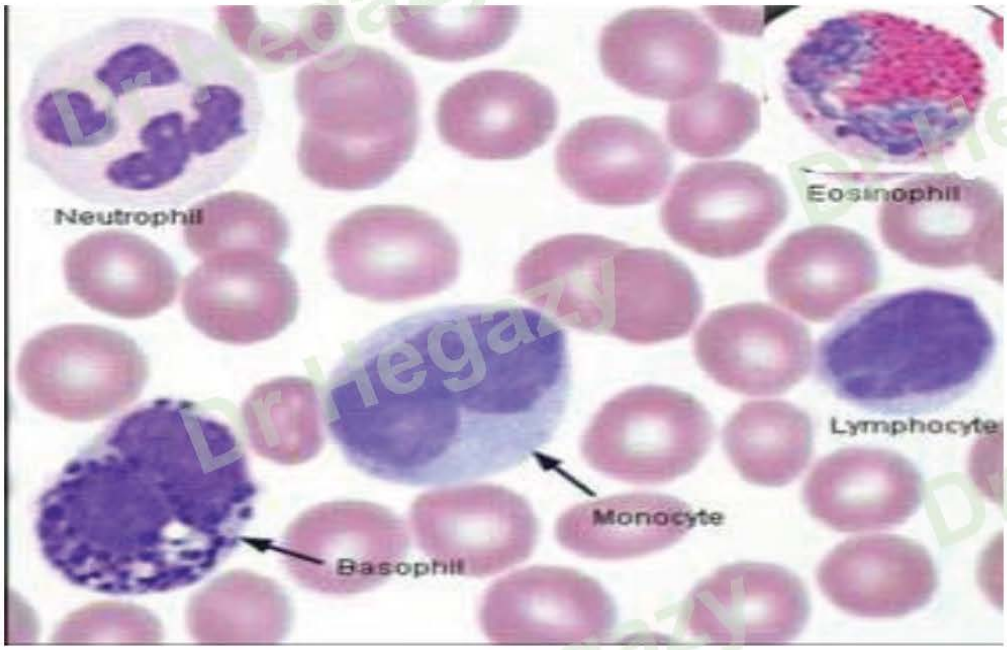

Granulomere
Central granular region

Hyalomere
Peripheral clear region

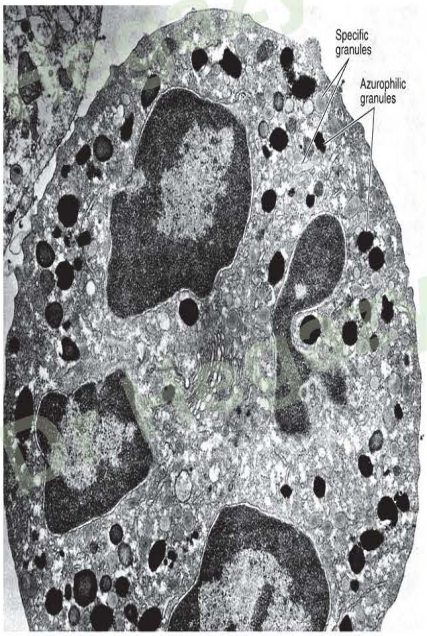

WBCs in blood film (blood smear)
Leishman's stain

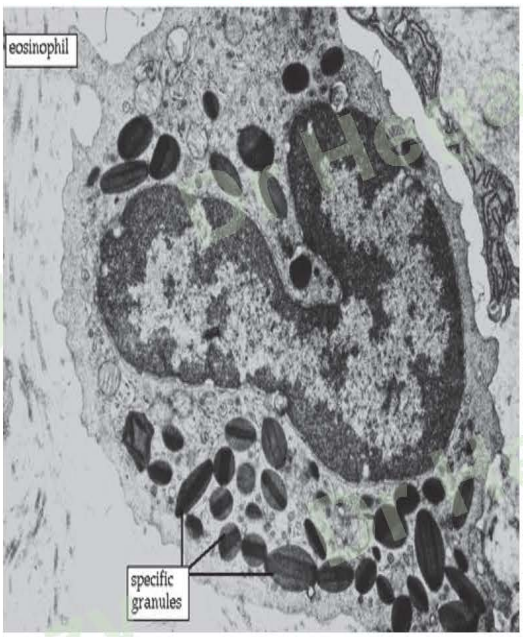

Dr Hegazy

TEM of granulocytes

Neutrophils

Eosinophils

Basophils

Dr Hegazy
